

# Open Source Teams

Patrick Wagstrom  
patrick@wagstrom.net

Work with Kathleen Carley and James D. Herbsleb

Carnegie Mellon  
**Software**  
INDUSTRY CENTER

# Open Source

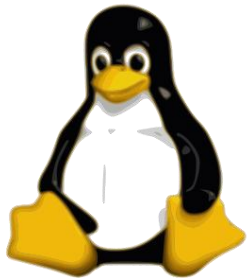

- License under which software is distributed
- Process by which software is created
- Possible to have one without another
  
- Projects obtain contributions from numerous sources
- Brought together to create canonical version
- Lightweight interaction model
  - Modular architecture supports development
  - Code helps minimize communication needs

**open source**

# Open Source Ecosystems

- Increasingly, projects are part of a larger community
- Common technologies bind projects together
- Developers move easily between projects
- Projects build on other projects
  
- Ecosystems help provide stability
- Create platforms to build upon
- Encourage commercial adoption

# Open Source Ecosystems Bring Commercial Involvement

# Governance and Innovation in Practice
